The image shows two chemical structures. On the left is the structure of poly(2-vinylpyridine), consisting of a repeating unit with a pyridine ring attached to a vinyl backbone. On the right is the structure of poly(2-vinylpyridine-co-vinylidene fluoride), showing a copolymer chain with alternating units of 2-vinylpyridine and vinylidene fluoride.

Figure 1 consists of 12 bar charts, each representing a different demographic or lifestyle category. The x-axis for all charts is 'Age Group' with categories: 18-24, 25-34, 35-44, 45-54, 55-64, and 65+. The y-axis is 'Percentage' from 0 to 100. The categories are: 1. Age, 2. Gender, 3. Education, 4. Income, 5. Employment, 6. Marital Status, 7. Religion, 8. Ethnicity, 9. Political Affiliation, 10. Health Status, 11. Living Arrangements, and 12. Travel Habits. Each chart shows the distribution of responses for that category across the age groups.
